

INDICE DE CONCORDANȚE ALE NUMELOR PROPRII

xegeza textului biblic numără între instrumentele sale de lucru timpurii diferiți indici, concordanțe, cronologii, glosare etc., toate în ajutorul unei mai bune înțelegeri și folosiri a Scrierilor Sfinte. De un interes specific se bucură onomastica biblică. Deși pare un domeniu etern stabil în substanța sa, în fapt, prezintă o diversitate copleșitoare, generată, înainte de toate, de diversitatea limbilor în care se exprimă. În afară de acestea, numele proprii biblice au suferit prefaceri în numeroasele variante textuale, ce ne-au parvenit din vremuri imemorabile, prin copieri manuscrise succesive.

Invenția tiparului a stăvilit industria cărții manuscrise, precum și augmentarea fără sfârșit a còpiilor, variantelor mai mult sau mai puțin alterate ca acuratețe și doctrină ale Scrierilor Sfinte. A stimulat învățații teologi ai Bisericii creștine să fixeze în litera tiparului texte emendate, critice ale Bibliei, despovărate de scrierile apocrife (pseudoepigrafe), de omisiuni, greșeli etc. Ne-a ușurat cunoașterea istoriei marilor traduceri,¹ îndeosebi a Vechiului Testament din originalul ebraic/aramaic în limba greacă, apoi în limba latină și a traducerilor integrale ale Bibliei în limbile vernaculare ale neamurilor lumii.

Iată doar câteva argumente cauzale ce ne orientează în complexitatea și diversitatea onomasticii biblice. Este de remarcat că în toate traducerile naționale timpurii textul biblic a contribuit la evoluția limbii respective, edificând, nu în puține cazuri, adevărate monumente filologice naționale. Este și fericitul caz al *Bibliei de la Blaj*.² Textul ei a fost tradus în limba română și tipărit la Blaj, în 1795, de către călugărul bazilitan din Mănăstirea Sfintei Troițe din Blaj, Samuil Micu, istoric și filolog luminist. După cum însuși spune, „mai ales Testamentul cel Vechiu mai mult de Nou de pre cel elinesc a celor șaptezeci de dascalii l-am tălmăcit...”.³ Între alte izvoare folosite de cărturar, izvodul elinesc al Septuagintei⁴ justifică forma numelor proprii preluate/traduse din limba greacă, sensibil diferite de aceleași nume proprii provenite din surse ebraice. Literatura biblică de referință (dicționare, lexicoane, enciclopedii, concordanțe etc.)⁵, cât și edițiile moderne ale Bibliei, și-au însușit denumirile proprii după originalele ebraice, în general. Astfel, o minimă concordanță a numelor proprii s-a socotit a fi de trebuință sub forma unui *Indice*. Pentru studiul comparat, controlul sau identificarea unor

nume s-au folosit numele proprii din textul Bibliei de la Blaj, ca prim termen, urmat de corespondentul ebraic preluat frecvent după *Biblia Sinodală de la București* (1977), *La Bible de Jérusalem* (1988), *Biblia Cornilescu* (1996)⁶ și alte izvoare bibliografice.⁷ Fiecare poziție din indice, afară de trimiteri, este însoțită de adresa punctuală (capitol, verset) din Biblia – Micu. În foarte puține cazuri numerotarea versetelor la Micu este diferită cu +/- o poziție, față de celelalte surse folosite. În indice sunt înregistrate exhaustiv numele proprii din textul biblic propriu-zis, și nu cele din adnotările sau comentariile lui S. Micu, ce preced părțile/cărțile Vechiului și Noului Testament. Se precizează clasa onomastică, respectiv *toponim* (t) și *antroponim* (a). În multe cazuri, același nume propriu designează un toponim și un antroponim. Exemplu: *Efraim* numește o cetate, un munte, o poartă, un nume de persoană; *Elam* numește o cetate, un împărat (împ.), dar și numele altei persoane. S-a socotit utilă indicarea apartenenței și precizarea subclasei toponimelor sau a numelor de locuri: *câmpie*, *cetate*, *insulă*, *munte*, *pârâu*, *pustiu*, *râu*, *templu*, ș.a. La fel s-a procedat diferențind și în cazul antroponimelor sau a numelor de persoană: *apostol*, *idol*, *împărat*, *înger*, *logofăt*, *rege*, *sfânt* (sf.), *zeu* ș.a.

Majorității covârșitoare a numelor i s-a putut stabili concordanțele. Am depistat însă în Biblia blăjeană, prin studiu comparat cu izvoarele documentare, câteva zeci de nume proprii cu concordanță incertă sau zero. Ele sunt introduse în indice. Ne-am întâlnit frecvent cu o anume toleranță în folosirea variantelor aceluiași nume. De aceea le-am adunat la o singură poziție-mamă. Exemple: *Samea*, *Sameas*, *Samei*, *Sameos*, *Sameu*, *Samia* = Șemaia sau *Melhia*, *Melhias*, *Melhie*, *Melhea*, *Melhiu* = Malchia ș.a. Aceste variante apar în ordine alfabetică cu trimitere la poziția-mamă.

În conformitate cu principiile ortografice ale prezentei ediții, nu au intrat în categoria numelor proprii numele zilelor săptămânii, lunilor anului, punctelor cardinale, popoarelor, unele sărbători.
